

*Biology-Driven Clustering of Microarray Data: Applications to the NCI60 Data Set*

Kevin R. Coombes, Keith A. Baggerly, David N. Stivers, Jing Wang, David Gold, His-Guan Sung, [Sang-Joon Lee](#)

Anderson Cancer Center

In this note, we describe a way to analyze microarray data that uses significant biological information early in the analysis process. Methods that take advantage of existing knowledge are likely to provide more meaningful and more interpretable results than completely unsupervised methods.
